Grenada Drug Epidemiology Network (GRENDEN)

The **Grenada Drug Epidemiology Network (GRENDEN)** is the mechanism through which Grenada collects, analyzes, and disseminates information on drugs, and related information, for the purpose of monitoring trends, developing policy, and implementing appropriate programmes and responses. It is comprised of institutions which work in the area of drug control. The objectives of **GRENDEN** are: To provide accurate, relevant and timely statistical data on the nature and extent of the drug situation in Grenada; To increase coordination, dialogue, and cooperation among the institutions which work in the area of drug control, through the exchange of drug-related statistical information; To inform policy makers and the general public on drug trends and related matters. **GRENDEN** was established on 11 December 2002, and endorsed by Cabinet, effective 22 December 2002.

The Drug Control Secretariat is the **National Observatory on Drugs** in Grenada. It performs the administrative functions of **GRENDEN**.

Proposal for Policy Governing the Sale of Alcohol to and Consumption among Minors in Grenada; Kara Ashby, Cherry-Ann George-Smith and Ivan Jakimovski, St. George's University

Summary:

The paper examined several issues regarding the policy for the sale of alcohol and consumption among minors in Grenada. These included:

- i. Public Health Significance: Negative health effects associated with alcohol drinking among minors.
- ii. Alcohol drinking among minors worldwide, in the Caribbean and in Grenada.
- iii. Current legislation concerning the sale of alcohol in Grenada.
- iv. Factors which influences the consumption of alcohol among minors in Grenada.
- v. Proposals to address the problem of alcohol consumption among, and sale to minors in Grenada.
- vi. Key actors in facilitating the policy.
- vii. Interaction among contextual factors, our proposed policy and key actors in addressing the consumption and sale of alcohol to minors.

Results:

- i. Legal drinking age should be increased to 18 years.
- ii. Enforcement is necessary for proposed policy to be effective.
- iii. Population must be made aware of the significance of enacting policies to address the issue of alcohol consumption and sale as it relates to minors.
- iv. Role of media in raising awareness on the issue of alcohol consumption and sale as it relates to minors is necessary.
- v. Collaborative effort among key actors.

Conclusions:

The sale and consumption of alcohol among minors in Grenada is a problem. Legislation which governs such practice is out-dated and should be amended. Appropriate policies should also be established to address the issue of the sale and consumption of alcohol among minors.

Analysis Of Drug-Related Statistics, for the period 1 January To 30 June 2011 And 1 January To 30 June 2012; Drug Control Secretariat

Summary:

The analysis identifies percentage changes in various areas of drug control for the period, **1 January To 30 June 2012, over 1 January To 30 June 2011**. It does not identify factors which influence these percentage changes.

Results:

The key findings of the analysis are inter alia:

- i. There was a 100% increase in the number of females admitted for treatment, with an increase from seven (7) persons during the period 1 January to 30 June 2011, to 14 persons during the period 1 January to 30 June 2012.
- ii. Of the four main areas monitored by the Drug Control Secretariat, for drug-related admissions to the General Hospital, 68 percent of admissions (23 patients) had medical problems with alcohol liver disease.
- iii. No chemical precursors, or illicit pharmaceuticals containing controlled drugs, were seized by law enforcement authorities during the period under review.
- iv. For the period 1 January to 30 June 2011 and 1 January to 30 June 2012, eight hundred and fifteen (815) males and sixty (60) females were arrested for drug related incidences.
- v. Main drug-related offence committed by persons who were arrested and charged was the possession of marijuana. Five hundred and forty four (544) persons (62%) were arrested and charged for possession of marijuana.
- vi. Main country from which criminals were deported was the United States of America (20 deportees).
- vii. Increase by 115 % in the number of reports of Suspicious Transactions (RST) to the Financial Intelligence Unit (FIU), during the period 1 January to 30 June 2012 (88 RST) as compared to the period 1 January to 30 June 2011 (41 RST).
- viii. 4 firearms were forfeited by the Royal Grenada Police Force, in relation to drug trafficking, during the period 1 January to 30 June 2011. There were no seizures of firearms during the period 1 January to 30 June 2012.
- ix. A total of fifty (50 males) and one (1) female were sentenced to prison for drug related crimes, during the combined period 1 January to 30 June 2011 and 1 January 30 June 2012.
- x. Two hundred and fifty nine (259) samples tested for the presence of controlled drugs, for the period 1 January to 30 June 2011 and 1 January to 30 June 2012 combined.

Conclusions:

The use, production and trafficking of drugs continues to be a problem in Grenada. However, the findings of the analysis indicate that some successes were achieved by the authorities in reducing the problem.

Analysis Of Homicides In Grenada, 1 January 2008 to 10 October 2012; Drug Control Secretariat

Summary:

This paper presents a statistical analytical overview of homicides in Grenada for the period 1 January 2008 to 10 October 2012. The paper does not examine factors which influenced these homicides, nor does it provide strategies to prevent or reduce homicides. Grenada is a small country, both in size and population. Families and communities are close-knit. Given this situation, the occurrence of homicides is quite traumatic and generally plunges the country into a state of, 'shock and bereavement'.

Some 40 per cent of countries have homicide rates under 3 per 100,000 population, while in 17 per cent of countries it is greater than 20 per 100,000, reaching 50 per 100,000 in some countries and as high as 80 per 100,000 in others. Since 1995, the homicide rate has decreased in many countries, mainly in Asia, Europe and Northern America, to the extent that it can be a relatively rare occurrence. Yet it has increased in others, particularly Central America and the Caribbean, where today it can be seen to be nearing crisis point. The rate of homicides in Grenada is 11.5 per 100,000 persons.

Results:

- i. 62 homicides (48 males; 14 females) were committed between 1 January 2008 and 10 October 2012.
- ii. 77 % of homicide victims were males; 23 % victims were females.
- iii. Most homicides were committed in 2008. (19 persons)
- iv. Most homicides of males occurred in 2008. (17 males)
- v. Most homicides of females occurred in 2012. (5 females)
- vi. Parish of St. George's recorded the highest number of homicides. (19 males; 7 females)
- vii. There were no homicides in the parish of St. Mark's.
- viii. No females were killed in the parishes of St. John's, St. Mark's and St. Patrick's.
- ix. The consumption of alcohol by the perpetrators and victims was involved prior to the commission of some homicides.
- x. None of the homicides was connected to drug trafficking.

Conclusions:

The number of homicides committed in Grenada during the period under review is high, compared to the world-wide rate of homicides. Further analysis of homicides in Grenada, for the period under review is recommended.
